

PCI Data Acquisition

16-Bit Performance

12-Bit Price!

New DaqBoard/500™ Series

Two 16-bit, 100-kHz D/A converters**

16 analog inputs, selectable on a per-channel basis as single-ended or differential

Rugged industry-standard SCSI-3 connector

Up to four boards can be installed into one PC

16-bit/200-kHz A/D (the "other guys" use the same A/D and charge 2-4 times as much)

100% digital calibration on all ranges

1 counter, 2 timers

24 digital I/O

DMA bus mastering for continuous streaming to the PC (we integrated everything into one chip, which is why we can charge 2 to 4 times less than the "other guys")

\$199*

www.daqboard.com

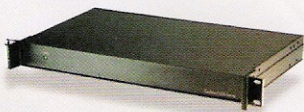

FREE software support for ActiveX/COM, LabVIEW®, Visual Basic®, and C++ (the "other guys" charge for their drivers)

DaqView/500™ data logging software (FREE 30-day trial version included)

| Model | Analog inputs | Digital I/O | Analog outputs | Counter-timers | Software drivers | Qty 1 price | Qty 5+ price | OEMS – contact IOtech for an evaluation kit |
|--------------|---------------|-------------|----------------|----------------|------------------|-------------|--------------|---|
| DaqBoard/505 | 16 | 24 | 0 | 1 - 2 | free | \$249 | \$199 | |
| DaqBoard/500 | 16 | 24 | 2 | 1 - 2 | free | \$349 | \$299 | |

* Quantity 5 – \$249 single quantity price ** On DaqBoard/500 model

Targeting your test and measurement needs

Precision and speed when you need it most

We offer the widest range of high-speed digitizers available on the market today. Our powerful PC-based instrumentation products allow you to create reliable, flexible and high-performance solutions quickly and easily.

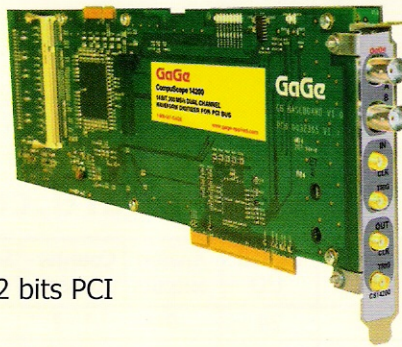

Reduce development time and costs for testing complex applications such as radar, wireless communications, spectroscopy, etc. by using our GageScope software or SDKs.

Contact us today for more information.

Precision and high speed in a single digitizer card

CS14200

- 14-bit resolution
- 200 MS/s on 2 simultaneous channels
- 100 MHz bandwidth
- Up to 1 GS on-board in a single PCI slot
- Up to 200 MB/s throughput via 66 MHz, 32 bits PCI
- Full-featured front-end
- Absolute ease of integration with Clock In & Out, Trigger In & Out
- Programming-free operation with GageScope®

APPLICATIONS

- Spectroscopy
- Radar System Design and Test
- Signal Intelligence
- Lidar Systems
- Wireless Comm
- Non-Destructive Testing
- High-Performance Imaging
- Manufacturing Test

Gage Applied Technologies

Low-Cost USB Data Acquisition

Choose from 7 Different I/O Options

- Volts and TC measurements in one module
- 500V optical isolation from PC
- 22-bit A/D converter with programmable inputs from ± 31 mV to ± 20 V full scale
- USB-bus powered
- Built-in cold-junction compensation for direct thermocouple measurements
- Digital I/O and counter/timers
- Removable screw-terminal signal connections
- Digital calibration

- Personal DaqView™, spreadsheet-style software for *Out-of-the-Box™* setup, acquisition, and real-time display
- Support for Visual Basic®, C/C++, LabVIEW®, and DASyLab®
