Project title: Annotating Surveillance Scenes in Real-Time

Degree: M. Eng student

Email: mndhamod AT cim DOT mcgill DOT ca

Website: http://www.cim.mcgill.ca/~mndhamod/
Project summary:

Developing a surveillance system that is capable of recognizing people in a video stream from a surveillance camera, categorizing their actions, and raising an alarm in case of “suspicious” behaviour. The developed algorithm should work in real time and overcome difficulties such as shadows, occlusion, lighting changes, and non-static background.
